

Camp Waste Disposal

Your patrol waste disposal area is essential to ensure good hygiene, as well as following the principles of Leave No Trace. Your waste disposal area should be designed to help you segregate your waste. For example you should have bags for general waste (cooked food and non-recyclable); recyclables (paper, cardboard, plastics, and metals); compostable (vegetable, fruits, peelings and choppings); and, glass bins. Bins and bags should not be over full and should be covered.
