

Waterproof Fire Starting Pods

Easily made kit to help you light a fire in different situations, especially backwoods conditions.

You will need:

- Straw(s)
- Pliers
- Pointy stick has to fit inside straw
- Cotton rounds
- A lighter or match

Cut the straw with scissors about an inch apart

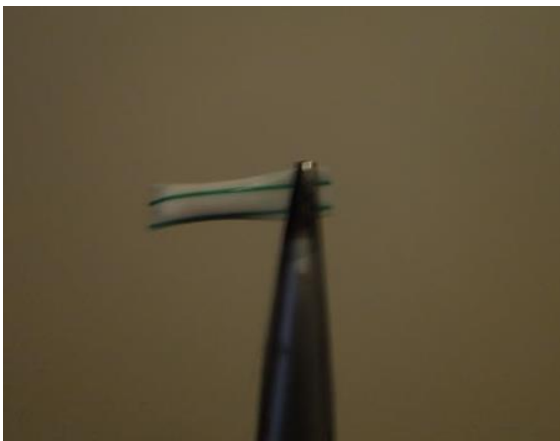

Hold one of these pieces with the Pliers about 0.5 mm from the end.

Now light the lighter or matches and fuse the straw shut

Now stuff the straw with as much cotton as you can fit but leave some room in the straw to seal it later

Final Step: Hold the straw again about 0.5 mm from end and seal it up

When you want to use it just cut it open and light it. Spread the cotton it light it easier
