

# Waterproof Matches Kit

This simple case allows you to carry matches with you to use when camping, hillwalking or in survival situations.

You will need: Small container (sweet tins, film canister), matches & match box, glue, candle/wax.

Use an empty waterproof container to carry matches and cotton wool/pads as kindling.

You can also waterproof the matches by placing them on a strip of cardboard (part of the matchbox) and covering them with wax.

Cut the rough sides off a matchbox and glue them together; sandpaper also works.

Store the matches, rough strips and kindling in the container.
