

Campcraft: Quadpods

Line up the staves so that the lashing is at an equal height on all the legs. Have the staves closer to each other. Begin with a clove-hitch and weave the sisal/rope tightly around the staves.

Continue weaving the sisal/rope around the staves at least 3 times.

The lashing is tightened with frappings by bringing the sisal/rope around the weaving in-between the staves. End with a clove-hitch.
